Osint

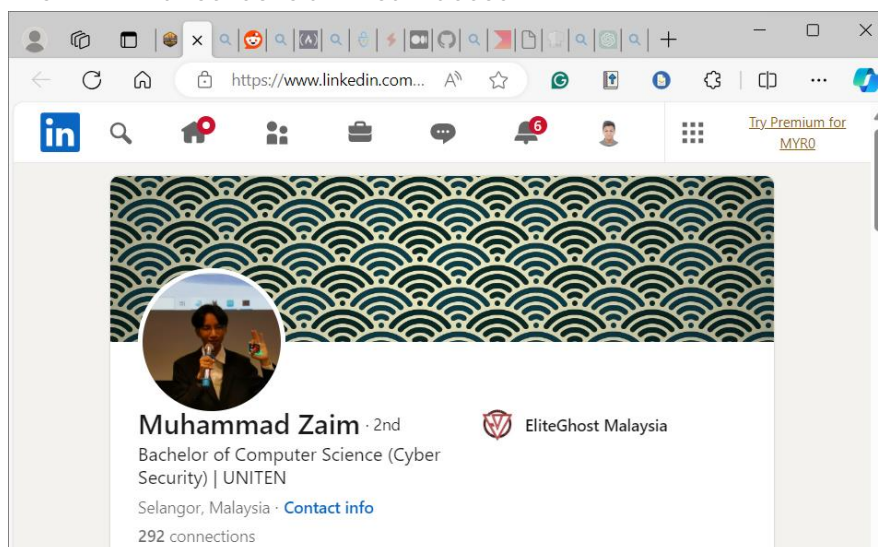

1- The link will direct us to a linkedin account.

2- Clicking on "Show credential" for Ethical Hacking Mastery 2023 will direct us to a website

3- It Directed us to another clue where there is a dog like the picture below
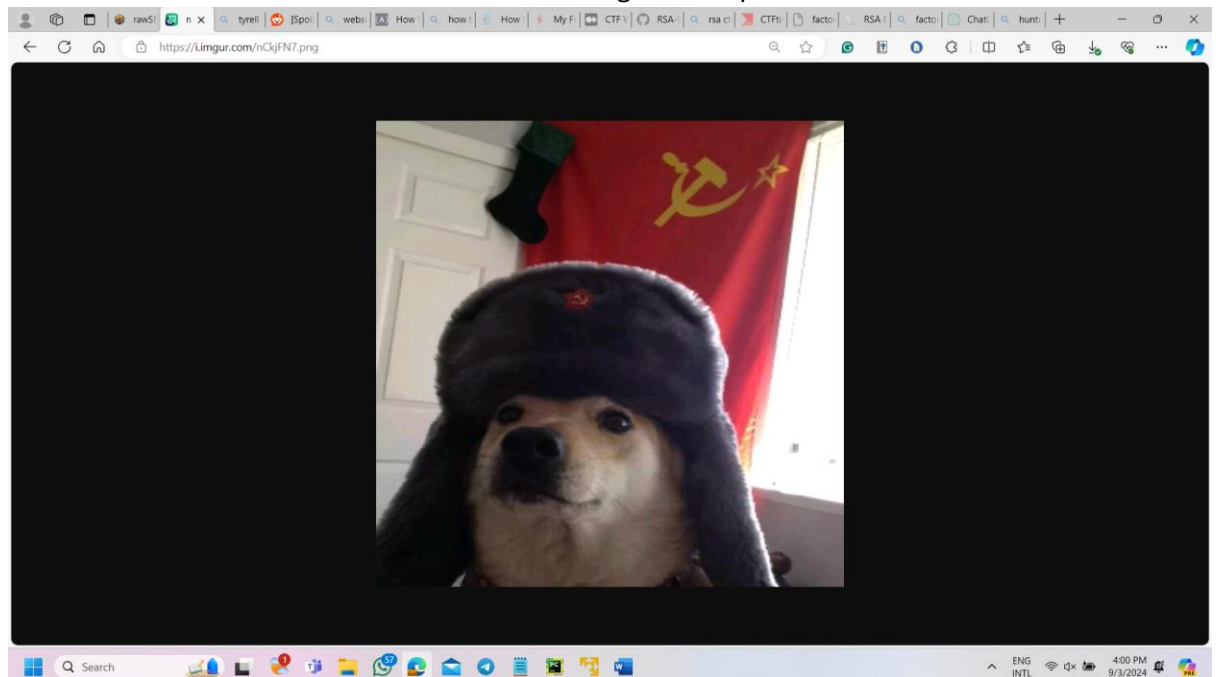

4- We modified the website url a little to " https://i.imgur.com/ "

5- Then we try to find about "russian hacker", and we found only one picture that was specifically the same from the picture we found
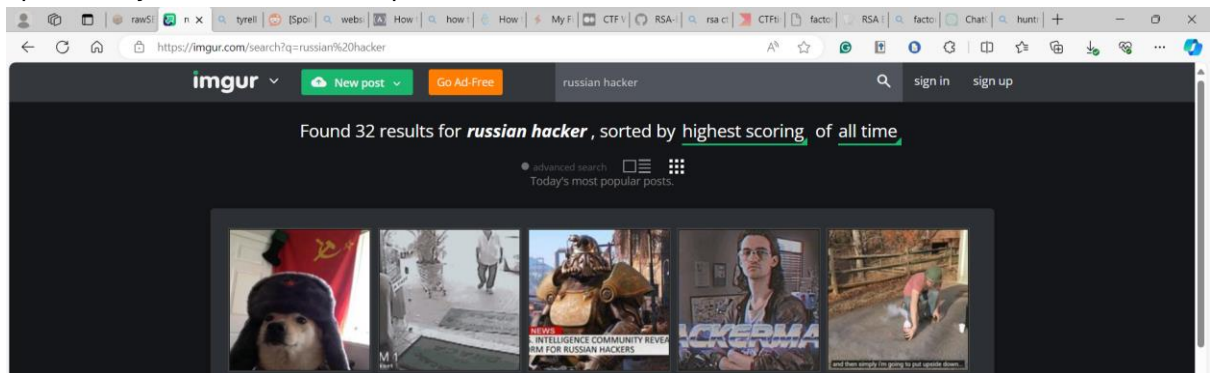

6- In the comment, we found a comment that was only 20 days ago

7- We try to find the github account and found

8- We find some suspicious encrypted text

9- We decrypt it and found the flag

Output

If you see this, that means you're one of us. CONGRATSS !! For your information, we are being
targeted by Zombie Intelligence Agency (some kind of CIA but zombie) and they're after us. We
can't use this platform anymore to communicate. I heard one of Japanese blogging sites are safe
to use since the zombie only talk English (??). From now on, We will communicate through that
blogging site, its quite famous though, see you there !!
